

**HOW IS MLS LASER
THERAPY CHANGING
THE GAME FOR
FOOTBALL PLAYERS?**

CUTTING EDGE LASER TECHNOLOGY, 2023

REDUCING OPIOID MISUSE

Misuse of opioids is an unfortunately common issue in the NFL, which could lead to lifelong consequences such as addiction and other health concerns that impact quality of life. A survey of **644 retired NFL players** found that **52%** used opioids during their career, with **71% reporting that they misused opioids.**

With acknowledgements from the Centers for Disease Control and Prevention (CDC) and the American Academy of Orthopaedic Surgeons (AAOS) **MLS Laser Therapy is a viable alternative to prescription pain killers.**

MLS Laser Therapy is a **painless, drug free** treatment that can help athletes decrease their reliance on opioids when recovering from injuries.

Laser therapy is growing in popularity in sports medicine for a wide range of conditions, including these commonly seen in football:

- Sprains / Strains
- Knee / Joint Injuries
- Achilles tendonitis
- Plantar Fasciitis
- Epicondylitis / Overuse injuries
- Wounds / Contusions
